Chitogel™ 

How can Chitogel™ help **my recovery?**

After sinus surgery, problems can arise when openings narrow or close off due to scar tissue forming. This may result in a recurrence of symptoms and may require additional medical or surgical treatment⁽¹⁾.

Chitogel™ is placed in the sinuses to improve wound healing and keep the sinuses open, enhancing your outcomes after endoscopic sinus surgery.

There when it's needed, gone when it's not

Soft and pliable gel that enhances post-operative comfort

Clears naturally in 7-14 days with nasal irrigation

Proven, safe and effective to promote natural wound healing

Optimising wound healing after sinus surgery is critical to achieving **long-term, positive patient outcomes**

Supports healing

Enhances wound healing and promotes healthy sinuses⁽²⁾⁽³⁾.

Controls bleeding

Controls minimal bleeding after sinus surgery⁽⁴⁾.

Prevents scarring

Prevents adhesions between mucosal surfaces in the nasal cavity⁽²⁾.

“It’s nice just to be able to lie down to sleep, and just live a normal life”.

Maureen’s Recovery⁽⁵⁾
